Tango/04 to attend Midsize Enterprise Summit

- **Tango/04 will introduce its celebrated 1, 2, 3 Monitoring Solution which allows infrastructure, security and BSM monitoring with only one tool**
- **Tango/04 is the leading provider of monitoring solutions in Europe's and Latin America's insurance and banking sector**
- **Thanks to Tango/04's monitoring solutions, enterprises of any size can perfectly align their IT with their business**

Dallas (TX) 14 to 17 September 2008– Tango/04 Computing Group, a leading developer of software for Systems Management, Security Auditing and Business Service Management will attend the Midsize Enterprise Summit, held from September 14 to 17 in Dallas (TX). Tango/04 will introduce its 1,2,3 monitoring solution which allows enterprises of any size to monitor its IT Infrastructure, Security and Business Services with one comprehensive multi-platform monitoring solution.

"We are very looking forward to this event", says Nicolas Brosky, Tango/04 North America Operations Manager, "because we think we can offer something that our competition cannot: covering all your monitoring needs with only one solution. We also think that visitors at this event will be astounded by the speed of our implementation projects. As an example, we integrated a complete multi-platform monitoring project in ING's systems in less than 40 working days; an industry record I think".

About the Tango/04 1, 2, 3 Monitoring Approach

Tango/04 is the only solution capable of easily controlling and proactively dealing with any event that may affect an enterprise, whether a security breach, an IT infrastructure incident or a business-related problem. The same core foundation monitors:

- 1) Infrastructure and Operations: servers, databases, network equipment, etc
- 2) Security: Auditing and Legal Compliance (SOX, J-SOX, HIPAA, PCI, CFR 21 Part 11, etc.)
- 3) Business: Applications, Service Level and Business Service Management (SLM and BSM)

About Tango/04 Computing Group

Tango/04 Computing Group is the European leader in real-time enterprise monitoring. Tango/04 develops award winning software solutions for Application monitoring, Security and Compliance monitoring and the management of Business Services (BSM) and Service Level Objectives (SLM).
